

Deco melts lollies

Make lollies yourself with the FunCakes Deco Melts as a treat for any party.

Boodschappenlijstje

PME Lollipop Sticks -16cm- pk/35

LS172

€2.25

Patisse Parchment Paper Sheets
38x30cm pk/20

P01733

€3.85

Other materials for lollies:

- Glass bowls suitable for the microwave
- Baking tray

Melt the Deco Melts at 450W (max. 500W) each in a separate bowl. Stir well every 15-20 seconds. Stop heating when the melts are almost completely melted (small bits of melts still visible). Keep stirring until the melts are smooth and completely dissolved.

Fill the decorating bags with the melts and cut off a small tip. Pipe rounds on the parchment paper and put in a lollipop stick. Let them harden in the fridge for 3-4 minutes.

Take them out of the fridge and make a drizzle of various colors over the lollipops. Place them back in the fridge to harden (10-15 minutes).
