

Chalkboard cake

Painting and writing on cakes is hip! In this recipe we will explain you how to create a chalkboard effect on your cake. You can of course apply this to any cake you want.

Boodschappenlijstje

Sugarflair Rejuvenator Spirit (Alcohol)
14ml

K101
€4.55

PME Modelling Tool Scriber Needle

PME6
€5.19

Cover your cake with black fondant. Scratch with a needle tool carefully the rough lines of the text and decorations you want to paint on the cake.

Put a little bit of colouring on a plate and dilute this with the rejuvenator until it has the correct thickness to paint. If you don't want to use alcohol, you can use water, this remains only a bit longer wet (alcohol evaporates faster).

Use the fines brushes to write the letters and the thicker ones to color some drawings.

Tip: support your wrist against shivering with your other hand!
