

Tiered Cake with Covering Paste

FunCakes has introduced a new type of fondant to their product range: the covering paste! This is a fondant that's incredibly flexible and easy to work with, making it the ideal choice for covering your cakes. You can roll out the covering paste to a thickness of less than 2 mm, perfect for flawless edges! Choose your favourite color of covering paste and give it a try with this recipe. We're already big fans of it!

- Wilton Dowel Rods Plastic set/4
- Wilton Comfort Grip Spatula Curved 22,5 cm
- Wilton Taartzaag / Cake Leveler -25cm-
- FMM Multi Ribbon cutter

Step 1: Bake the Sponge Cake

Preheat the oven to 180°C (convection oven 160°C) and grease the cake pans with baking spray. Prepare 500 grams of FunCakes Mix for Sponge Cake as indicated on the packaging. Divide the batter between the cake pans and bake the sponge cakes for approx. 30-35 minutes until they are fully cooked. Turn them out onto a cake rack and let them cool thoroughly, immediately after baking.

Step 2: Prepare the Buttercream

Meanwhile, prepare 300 grams of FunCakes Mix for Buttercream as indicated on the packaging.

Step 3: Cut and fill the sponge cakes

Cut each sponge into two layers using a cake leveler and fill them with jam of your choice and a thin layer of buttercream. Afterward, cover the entire exterior with a thin layer of buttercream. Place the cakes in the refrigerator and let them set for at least half an hour.

Step 4: Cover the cakes with covering paste

Knead the covering paste until it's smooth and roll it out to a thickness of 2 mm. Use it to cover the cakes, and use a diamond cutter to create a pattern on the smaller cake. Finally, attach the white pearls in the intersections.

Step 5: Create the decorative border

Take a portion of the covering paste and roll it into a long stick shape. Impress the texture with an impression mat and use a strip cutter to create a strip that's approx. 3 to 4 cm wide, long enough to go around the cake. Secure it with edible glue.

Step 6: Stack the cakes

Insert four dowels into the larger cake and cut them to size. Place the smaller cake on a cardboard cut to fit if needed, and use a bit of buttercream to ensure the cakes don't shift.

Step 7: Decorate the tiered cake

Coat the styrofoam balls with piping gel and cover them with a thin piece of covering paste. Attach the balls to the cake using a bit of buttercream.

Step 8: Enjoy this Elegant Tiered Cake with Covering Paste!
