- Culpitt Floral Wire Silver set/50 -24 gauge-
- PME Flower Pics Small pk/12

## Step 1: Make the sugar paste hearts

Knead some of the Smartflex Sugar Paste Red, Pink and White well until the sugar paste is smooth and roll out the sugar paste to a thickness of about 2 mm. Then cut out the sugar paste with the smallest Patisse Cookie Cutter Heart. Cut a Culpitt Flower Wire Silver into three sections, dip the end in the FunCakes Edible Glue and insert this into the cut-out hearts. Ideally, let this dry for a day.

## Step 2: Make the black sugar paste borders

Knead some of the Smartflex sugar Paste Black with some Crisco Shortening to help you get the sugar paste out of the extruder better. Then place your sugar paste in the Scrapcooking Fondant Extruder and keep turning until a string of black sugar paste comes out of the extruder. Then make black borders around the sugar paste hearts and stick it on with some edible glue. Leave this to dry for a few hours.

## Step 3: Make the FunCakes Mix for Sponge Cake

Grease the Wilton Baking Mould Heart with baking spray and preheat the oven to 180 degrees (hot air oven 160 degrees). Then prepare 250g FunCakes Mix for Sponge Cake with 4 eggs and 25ml water as directed on the package. Colour the batter light pink with the FunCakes Food Colour Gel Pink.

Place the batter into the greased pan and bake the sponge cake for about 30-35 minutes. Immediately after baking, dump onto a cake rack and leave it to cool. Make a second sponge cake in the same way and colour it dark pink with FunCakes Food Colour Gel Pink. Add some more food colouring to get a dark pink colour.

#### **Step 4: Make the FunCakes Mix for Buttercream**

Make 200 g of the FunCakes Mix for Buttercream with 200 ml of water and top it off with 250 g of soft unsalted buttercream as indicated on the package.

#### **Step 5: Fill and cover the sponge cake with buttercream**

Cut both sponge cakes once or twice with the cake leveler, depending on how many layers you want. Fill the sponge cake with the made buttercream and stack the light pink and dark pink biscuits alternately. Then spread the cake all around and put it in the fridge for an hour to allow the buttercream to set.

#### **Step 6: Line the biscuit with the Smartflex Sugar Paste**

Knead the rest of the Smartflex Sugar Paste Red well and roll out the sugar paste to a thickness of about 2 mm. Line the cake with this and smooth the fondant nicely using the Dr. Oetker Fondant Smoother.

#### **Step 7: Decorate the cake with sugar paste**

Knead the Smartflex Pink sugar paste smoothly and roll this into a long thin strand. Press this slightly flat with your finger. Stick this to the centre of the cake with some edible glue. Then line the whole cake with black lines of fondant to create a cartoon effect.

Roll out some white and pink sugar paste thinly and cut out various sizes of hearts with the Patisse Heart Cookie Cutter. Stick the hearts onto the cake with some edible glue and outline them with a black line of fondant.

Press a small piece of sugar paste into the PME Flower Pics and stick this into the cake. Place the hearts on wire in the pics.
