

Chocolade milk

Would you like to make chocolate milk on an original way? You can do this easily by melting chocolate melts and letting them harden on spoon. Decorate the spoons with marshmallows and let children make their own hot chocolate!

Other materials:

- Big spoons
- Milk

Melt the chocolate melts of your choice in microwave, heat the chocolate on half power every 30 seconds. Use a microwave safe bowl or a measuring cup from Wilton.

Put the chocolate on the spoons and place some marshmallows on top. Let the chocolate harden. You can do this a few days ahead, but save the spoons in a closed bag, so that the marshmallows can't dry in.

Heat the milk and present them together with the spoons on plate or a lovely serving tray. Stir the chocolate spoons true the hot milk and you have original homemade hot chocolate!
