Other materials:

- 375 gram butter
- 5 eggs (size M, approx. 250 gram)
- 100 ml water
- Rased coconut
- Cacao poeder

Preheat the oven to 180°C (convection oven 160°C). Put 500 grams of the mixture, 250 grams of butter and 5 eggs (approx. 250 grams) in a bowl and mix on low speed for 4 minutes to a smooth batter. Lubricate a cake pan (30 cm) and fill the pan with the batter. Bake the cake in approx. 70-75 minutes. Let the cake cool down.

For the buttercream add 100 ml of water to 100 grams of the mixture and beat with a whisk. Then let the mixture rest for at least 30 minutes. Beat 125 grams of unsalted butter for approximately 1 minute until creamy. Add a quarter of the mixture to the butter and beat until the mixture has been completely absorbed before adding the next quarter of the mixture. Once all of the mixture has been added, beat for another 5-10 minutes to a smooth buttercream.

Crumble the cake in a bowl and knead the buttercream through it. Form balls of approx. 30 gram. Let them stiff in the freezer for approx. 15 minutes.

Melt the candy melts in the microwave, chocolate smelter or au bain marie. Dip the sticks in the melted chocolate, one by one, stick them in the cake pops and let them stiffen for approx. 10 minutes, so that they hold.

Hold the cake pops above the melt candy melts and pour over them with a spoon until they're completely covered. Dipping is also possible, but there is a chance the stick will come loose when
